THE SERVICE CATALOG

VoltWave Electric

A home, more connected.

Electrical. Lighting. Audio. Security.

Thoughtfully coordinated for the way you live.

Owner-supplied project photography

ONE HOME. MANY POSSIBILITIES.

Consider the whole picture.

Bring lighting, sound and connected-home planning together — from the first conversation to the finishing details.

03 Whole-home automation

04 Outdoor audio

05 Garden lighting

06 Interior LED lighting

07 Soffit lights

08 Security cameras

09 Electrical + low-voltage rough-in

10 Builder coordination / contact

Outdoor audio project photography

01 / CONNECTED LIVING

Less friction. More home.

Plan lighting, audio and everyday controls around your routines. Start with the spaces you use and the experiences you want.

Your routines · Your rooms · Your priorities

Whole-home automation project exterior. Systems are not visible in this photograph.

02 / SOUND OUTSIDE

Good sound. Open air.

Bring music to the patio and garden. Coordinate speaker placement with gathering areas, landscaping and the way you move outdoors.

Garden speaker detail · Outdoor installation in progress

PROJECT DETAIL

PROJECT DETAIL

GARDEN SPEAKER

INSTALLATION PROGRESS

Outdoor audio: installed speakers, gathering spaces and installation work.

03 / AFTER DARK

A different kind of evening.

Give palms, planting and outdoor spaces a new presence after sunset. Plan the balance between accent lighting and the surrounding home.

Light the landscape, not just the path.

PROJECT DETAIL

PROJECT DETAIL

Completed landscape lighting photographed at night.

04 / LIGHT WITH INTENTION

Architecture, in a new light.

Use ceiling coves and integrated LED lighting to bring depth to a room. Coordinate the lighting detail with finishes before the space is complete.

Installation progress — not completed interiors

INSTALLATION PROGRESS

INSTALLATION PROGRESS

Lighting illuminated during fit-out. These interior photos show work in progress.

05 / THE EXTERIOR EDGE

Make the arrival count.

Bring definition to the roofline and exterior. Discuss fixture positions and the evening effect alongside access and installation planning.

From installation progress to the evening result

PROJECT DETAIL

INSTALLATION PROGRESS

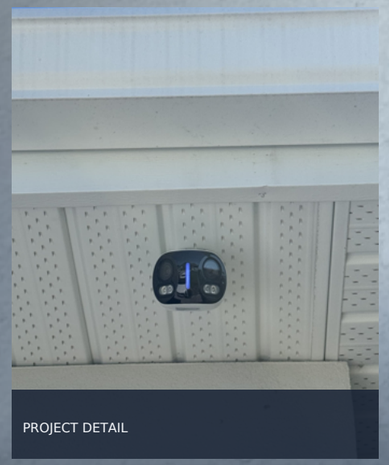

Main: finished lighting at dusk. Details: daytime fixtures and installation in progress.

06 / A CLEARER VIEW

See more of what matters.

Plan camera views around entrances and outdoor areas. Coordinate placement, access and cabling with the building — not as an afterthought.

Installation progress is shown in the technician photos

INSTALLATION PROGRESS

Installed camera details and owner-supplied installation progress photos.

07 / BEFORE THE FINISHES

Plan ahead. Connect later.

Coordinate electrical and low-voltage rough-in for internet, audio and cameras while the project is taking shape. Agree on scope before the next stage.

Electrical · Internet · Audio · Cameras

Owner-supplied construction exterior video. Interior wiring is not visible.

LET’S TALK ABOUT YOUR PROJECT

Start with a conversation.

For homeowners and builders: share your priorities, project stage and the spaces you want to improve. Coordinate scope, responsibilities and next steps with VoltWave Electric.
